```
bool FB::DefaultBrowserStreamHandler::onStreamOpened ( FB::StreamOpenedEvent * evt, v  
                                                       FB::BrowserStream * Stream t  
                                                       ) ir  
                                         u  
                                         al
```

Called when the stream was opened successfully.
