```
std::string FB::JSAPIAuto::ToString ( ) inlinevirtual
```

Default method called when a string value is requested for the scriptable object.

Override this to provide your own, otherwise it returns the description passed to the constructor.

Returns

A string representation of this object.

Definition at line 293 of file JSAPIAuto.h.

```
294 {  
295     return m_description;  
296 }
```
