~DefaultBrowserStreamHandler

```
bool FB::DefaultBrowserStreamHandler::onStreamCompleted ( FB::StreamCompletedEvent evt, v  
                                                         FB::BrowserStream * Stream [ ir  
                                                         ) Stream [ u  
                                                         ) a
```

Called when the stream finished downloading successfully.
