Handler

```
bool FB::DefaultBrowserStreamHandler::onStreamCreated ( FB::StreamCreatedEvent evt, v  
                                                       FB::BrowserStream * Stream t  
                                                       )          U  
                                                       al
```

Called when the stream was created.
