stream
~DefaultBrowserStreamHandler

```
bool FB::DefaultBrowserStreamHandler::onStreamFailedOpen ( FB::StreamFailedOpenEvent evt, v  
                                                         FB::BrowserStream *   Stream [ ir  
                                                         )                               u  
                               a
```

Called when the stream failed to open.
