```
std::string FB::FactoryBase::getPluginDescription ( const std::string & mimetype )
```

This is an overloaded member function, provided for convenience. It differs from the above function only in what argument(s) it accepts.

Definition at line 64 of file `FactoryBase.cpp`.

```
65 {  
66     return FB::getPluginDescription(mimetype);  
67 }
```
