stream
~DefaultBrowserStreamHandler

```
bool FB::DefaultBrowserStreamHandler::onStreamAttached ( FB::AttachedEvent evt, virtual  
                                                       FB::BrowserStreamStream tu  
                                                       )
```

Called when the stream is attached to this handler (may have already been created).

Definition at line 29 of file `DefaultBrowserStreamHandler.cpp`.

References `setStream()`.

```
30 {  
31   assert(Stream != NULL);  
32   setStream( ptr_cast<BrowserStream>(Stream->shared_from_this()) );  
33   return false;  
34 }
```

`FB::DefaultBrowserStreamHandler::setStream`

virtual void setStream(const FB::BrowserStreamPtr &stream)

Call to set the stream associated with this handler.

Definition: `DefaultBrowserStreamHandler.cpp:85`
